

## V-MAG SAFETY PRECAUTIONS

Following guidelines should be available and known to all people handling the V-MAG's from Engiso. Strong magnetic fields can destroy magnetic data, such as credit cards, electronic & mechanical components, and similar devices.

To avoid crushing the skin, fingers or other parts of the body magnets should be handled with great care because of the strong attractive forces. Always wear protection when handling V-MAG's

If any doubts, how to handle or use the magnets delivered from Engiso please contact us for further information.
