

TRANSPORTATION SOLUTIONS

PADS ARE A RELIABLE AND FLEXIBLE TRANSPORTATION SOLUTION KNOWN FOR ITS HIGH-PERFORMANCE

Introduction

Engiso PUR-PADS & EPDM-PADS

Our PUR-PADS are robust polyurethane pads delivering exceptional shock absorption and high tensile strength, making them suitable for heavy-duty transport requirements.

Our EPDM-PADS are high-resilience synthetic rubber pads designed for extreme durability and flexibility, with strong resistance to UV exposure, weather conditions and high temperatures—ideal for demanding transport applications.

Both pad types are engineered to ensure secure, efficient and long-lasting performance, offering key advantages such as high friction, safety-oriented design validation, troubleshooting support and turnkey transport solutions.

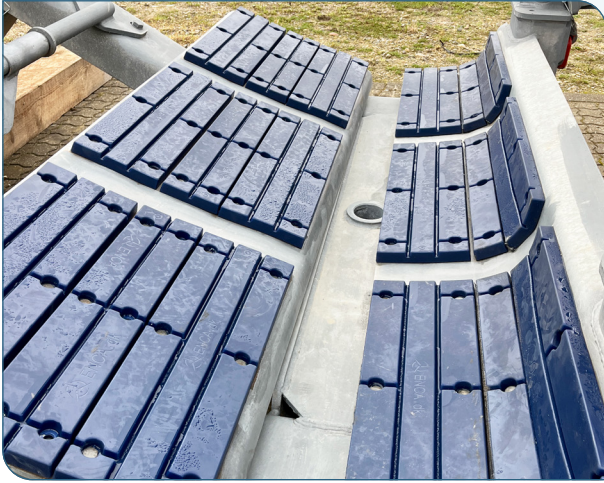

Key Features

- Specialized PUR & EPDM solutions
- Focus on safety and durability
- Trouble shooting
- Design validation
- Secure and efficient transport
- High friction
- UV resistancy
- Shock-absorbing ability
- Non stickiness

Turnkey transport solutions
